Introduction

The first multiplier event for the DIGIPSYRES Erasmus+ program "Enhancing digital and psychological resilience through peer networking in the online environment in times of crises" was held from 16-17th September 2022, at the 9th International Conference "Technics and Informatics in Education - TIE 2022", at the Faculty of Technical Sciences Čačak, University of Kragujevac, Serbia.

The overall objective of this multiplier event was to address the objectives of the project "Enhancing digital and psychological resilience through peer networking in the online environment in times of crises – DigiPsyRes", and to share the project results with a wider audience. At the same time, the aim of the event was to further promote the project on a higher level.

The multiplier event 1 (ME1) was approached through three phases:

1) ME1 preparation phase
2) ME1 organizational phase
3) ME1 follow-up phase

The multiplier event (ME1) consisted of several parts: a roundtable discussion (Friday 16th) and plenary opening speech and a special thematic session "Digital and psychological resilience" (Saturday 17th). The aim of the round table was the presentation of the DIGIPSYRES project and the results achieved up to this project stage as well as discussions with the representatives of various educational institutions and the wider local audience in Serbia. On the second day, in the opening speeches, the project was promoted with a talk delivered by the project manager, and a plenary lecture given by one of the project team members. The goal of the special thematic session was the presentation of scientific papers directly derived from the first two results of the project and exchange with researchers from related fields, all aimed at a wider international audience.

The targeted audience consisted of experts, practitioners, and other professionals in the field of psychology, pedagogy, IT, and technology, especially those who are engaged in any form of formal education and work with students. Of course, the ME1 also gathered a number of students, non-teaching staff, and other interested participants who were interested in the project outcomes.

Overall, the audience involved in this ME1 comprised registered 97 participants (both in-person and online) participants, from the following countries: Serbia, Croatia, Montenegro, Bulgaria, Poland, Italy, and Bosnia and Herzegovina.

We are very proud of the efforts that all partners have put in to organize this ME and we are also very satisfied with the results.

The preparation phase of ME1

The preparation phase of the ME1 started in spring 2022 when the TIE 2022 Call for papers was first designed. Along with that, a website with a special segment dedicated to DIGIPSYRES was launched. Initiatives were made to promote the project and its conference section in the public sphere, through e-mails and personal connections, and by using social media (LinkedIn, Facebook, and Instagram accounts). We welcomed proposals (original scientific, professional, or review papers) that deal with any kind of aspect of overcoming psycho-social obstacles in the digital environment through gaining

competence in the digital resilience process or addressing the issue of providing psychological support to help maintain the overall wellbeing of students.

In the preparation phase, the following activities were conducted:

- A website section dedicated to the project was designed and launched http://www.ftn.kg.ac.rs/konferencije/TIE2022/index.php?page=erasmus;
- Promotional material previously obtained from PMI project budget (pencils, notebooks, bookmarkers, rollups, flyers);
- Agendas and other working materials were created and distributed to all interested parties (ME1 files and bags);
- Links for online participation were generated and distributed;
- A number of Reports, Lists, and Certificates for the participants was designed and prepared.

Enhancing digital and psychological resilience through peer networking in the online environment in times of crises – DigiPsyRes

DigiPsyRes

Multiplier event 1: Enhancing digital and psychological resilience through peer networking in the online environment in times of crises – DigiPsyRes (9th International Conference TIE2022)

Agenda

Name: Multiplier event 1: Enhancing digital and psychological resilience through peer networking in the online environment in times of crises – DigiPsyRes (9th International Conference TIE2022)
Date: 16-17th September 2022
Organizing institution: University of Kragujevac, Serbia
Venue: University of Kragujevac, Faculty of Technical Sciences Čačak, Svetog Save 65, Čačak, Serbia

DAY 1 – 16th September 2022 **Roundtable discussion: Enhancing digital and psychological resilience through peer networking in the online environment in times of crises - ERASMUS+ project and interconnections**		
16:00-17:00	Registration of participants	
Part I – Introduction		
17:00 - 17:20	Opening speech	Prof. Nebojša Mitrović, Vice Dean for Science and International Cooperation of the Faculty of Technical Sciences Čačak, University of Kragujevac, Prof. Dragan Đurčić, Project Contact Person University of Kragujevac, Faculty of Technical Sciences Čačak, Serbia
		Prof. Aleksandra Błachnio Kazimierz Wielki University, Poland
		Piergiorgio Guarini University of Foggia, Italy
Part II – Enhancing digital and psychological resilience through peer networking in the online environment in times of crises - ERASMUS+ project and its interconnections		
17:20 - 17:30	DigiPsyRes Project overview	Milica Stojković University of Kragujevac, Faculty of Technical Sciences Čačak, Serbia
17:30 - 17:45	Psychological and digital resilience of students – presentation of pilot research results in Poland, Italy and Serbia (project results 1 and 2)	Prof. Darko Hinić University of Kragujevac, Faculty of Science, Serbia
17:45 - 18:00	Peer networking: PeerSolvers Project overview	Prof. Dragica Pavlović Babić, Marina Videnović, University of Belgrade, Faculty of Philosophy, Department of Psychology, Serbia

Agenda – Multiplier event 1: Enhancing digital and psychological resilience through peer networking in the online environment in times of crises – DigiPsyRes (9th International Conference TIE2022)

For further facilitation, registration for the event was organized. The link is available here: https://docs.google.com/forms/d/e/1FAIpQLSdSlJinLQo6x1tf54_E3VHXuSiS5It5JeV-6bh6bsUagrOLOQ/viewform

Organizational phase

The Multiplier event ''Enhancing digital and psychological resilience through peer networking in the online environment in times of crises'' was organized within the TIE 2022 conference, at the Faculty of Technical Sciences Čačak. The Conference traditionally gathers teachers, researchers and professionals engaged in various sectors of technical, technological and IT education.

Over the past 50 years, these gatherings have been organized in numerous forms (conferences, seminars, consultations, etc.) in Serbia and the region. From 2006 to 2014 the conference Technics and Informatics in Education – TIE was organized biennially at the Faculty of Technical Sciences as a national conference with international participation. As of 2018 TIE has a form of an international conference. The TIE conferences have had a huge impact on the development of IT, technical and scientific subjects in both primary and secondary education. The significant impact has also been perceived in diverse fields related to technology and IT education at the university level. Having all that in mind, the Conference was completely suitable for hosting a DigiPsyRes multiplier event and providing a structure for disseminating the project and its results.

The online sessions were all recorded (Appendix 1).

Summary

DAY 1: The Multiplier event "Enhancing digital and psychological resilience through peer networking in the online environment in times of crises" started with the roundtable discussion with prof. Milica Stojković as a moderator. On behalf of the University of Kragujevac welcome speeches were delivered by prof. Dragan Đurčić and prof. Nebojša Mitrović. The audience was also addressed by prof. Izabela Kapsa representing Kazimierz Wielki University, Poland and Piergiorgio Guarini, from the University of Foggia, Italy, both of whom participated in the online format.

After she had provided a project overview, prof. Milica Stojković talked about the Psychological and digital resilience of students – pilot research in Poland, Italy, and Serbia. She presented the main results of the project.

PeerSolvers project overview was given by prof. Marina Videnović, University of Belgrade, Faculty of Philosophy, Department of Psychology, Serbia.

The roundtable audience consisted of 37 registered participants (28 in-person participants and 9 online). The local media representatives were present as well.

The joint discussion that followed the presentations was useful and interesting. Many observations were made related to the DIGIPSYRES and the roundtable was concluded with the announcement of the upcoming project activities.

Figure 6. Roundtable discussion participants

DAY 2: The Multiplier event "Enhancing digital and psychological resilience through peer networking in the online environment in times of crises" proceeded with the plenary lecture of prof. Darko Hinić (University of Kragujevac) who touched upon the project's topic by addressing the problematic use of the Internet from a psychological perspective.

The full paper is available here: http://www.ftn.kg.ac.rs/konferencije/TIE2022/docs/papers/P2.pdf

Figure 7. Professor Hinić as a plenary speaker

DAY 2: The Multiplier event "Enhancing digital and psychological resilience through peer networking in the online environment in times of crises" culminated with the paper presentation session.

The papers presented were:

• *Digital resilience and psychological wellbeing of Italian higher education students: An exploratory study*

Benedetta Ragni, Piergiorgio Guarini, Guisi Antonia Toto and Pierpaolo Limone
http://www.ftn.kg.ac.rs/konferencije/TIE2022/docs/papers/S701_72.pdf

• *Perceived stress, cyber and psychological resilience among Polish students – preliminary results*

Aleksandra Blachnio, Kamila Litwic-Kaminska, Izabela Kapsa, Jakub Kopowski and Łukasz Brzeziński
http://www.ftn.kg.ac.rs/konferencije/TIE2022/docs/papers/S702_63.pdf

• *University students' resilience and perceived difficulties during the Covid-19 pandemic: a pilot study in Serbia*

Milica Stojković and Darko Hinić,
http://www.ftn.kg.ac.rs/konferencije/TIE2022/docs/papers/S703_71.pdf

• University students' well-being during emergency remote teaching reflections from the viewpoint of the Self-determination theory

Milan Stančić and Mirjana Senić Ružić

• Resilience of higher institutions in Serbia: A Student's perspective

Olja Jovanović, Ana Pešikan and Slobodanka Antić

• University teachers' resilience

Dragana Bjekić and Milica Stojković

• From collaboration to solutions: Encouraging collaborative problem solving through school practice

Aleksandar Baucal, Dragica Pavlović-Babić, Ana Altaras Dimitrijević, Ksenija Krstić, Zorana Jolić Marjanović, Ivana Stepanović Ilić, Marina Videnović, Smiljana Jošić, Tijana Nikitović, Kristina Mojović Zdravković, Milana Rajić and Jovan Ivanović

Figure 8. DIGIPSYRES paper presentation session – professor Stojković

Full papers are available here: http://www.ftn.kg.ac.rs/konferencije/TIE2022/index.php?page=list and they can be also found in Proceedings and Book of Abstracts (online and in paper form).

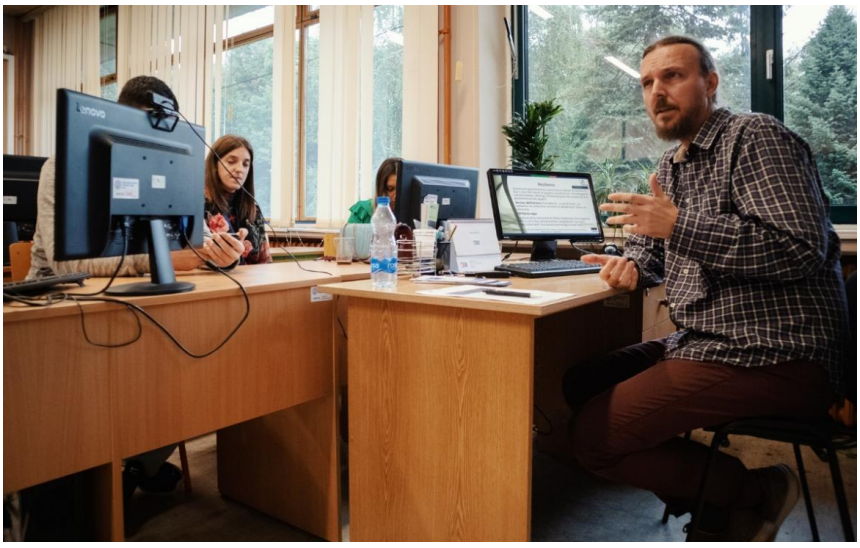

Figure 9. Professor Hinić presenting a paper

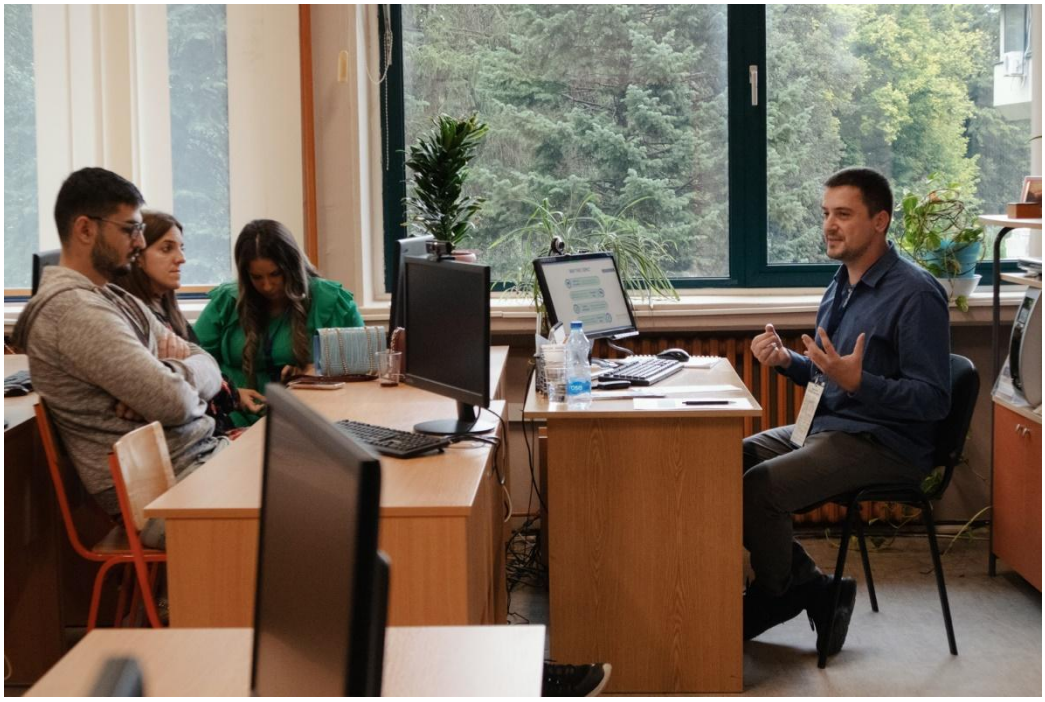

Figure 10. Professor Stančić, University of Belgrade, presenting a paper

The session was accompanied by a joint discussion and impressions from the audience. There were also comments coming from our online participants.

On behalf of the DIGYPSYRES team prof. Milica Stojković participated in the closing Conference ceremony on Saturday, September 18th by wrapping up the event results and providing final remarks.

A full multiplier event photo gallery is available at http://www.ftn.kg.ac.rs/konferencije/TIE2022/index.php?page=gallery&view=digi. Two video reports are available at Project Multiplier events page https://digipsyres.kg.ac.rs/multiplier-events/ (direct link to short video https://digipsyres.kg.ac.rs/wp-content/uploads/2022/09/DigiPsy-Video-Short.mp4 and full video https://digipsyres.kg.ac.rs/wp-content/uploads/2022/09/DigiPsy-Video.mp4)

Multiplier event in Media

A number of news reports were published in the media to announce the event or report after it was finished. On the official DIGIPSYRES accounts on FB and Instagram the event was also announced and promoted.

Results

Overall, the multiplier event was conducted over the span of 2 days (16-17th September 2022). The event generated interesting and intense discussions on various aspects of psychological and digital resilience. The results quantified in numbers are:

- 2-day multiplier event held
- One roundtable discussion held
- One plenary lecture held
- One paper presentation session held with 7 papers presented (and published in Conference Proceedings, with total of three paper presenting directly project results, adequately referencing a project)
- Photo and video event report
- 97 registered participants from 7 countries involved in the ME1 activities (37 on Friday 16th and 60 on Saturday 17th)
- 48 registered participants out of the consortium involved in the ME1 activities (11 international, 14 local and 23 online participants)
- Dozens of reports on TV, social media, portals on the event.

Conclusion

The overall objective of this multiplier event was to address the objectives of the project "Enhancing digital and psychological resilience through peer networking in the online environment in times of crises – DigiPsyRes", and to share the project results with a wider audience.

The dissemination event was attended by attendees of different profiles: university lecturers, elementary and secondary school teachers, researchers, students, entrepreneurs, engineers, political body representatives, journalists. The participants took part in the discussions and presentations over the two event days.

The event proved that we managed to promote the intellectual outputs of the DIGIPSYRES project to all the entities that might have been unaware of it, so that they could have direct knowledge of the work conducted in the initial phase of the project.
